
1: Fill out this short survey about Day 4: goo.gl/forms/HnObuflhP8w9fusp1

2: What's your working definition or previous exposure to experiments? What do you think are the opportunities and limitations?

Given the broad disciplinary background of our participants, many in this room will be familiar with running experiments and many will not be.

- If you are familiar with running a lab experiment, discuss your experimental process.
- For those who are not, think about the ways in which you might have used digital trace data or numerical simulations to simulate an experimental design (i.e. identify causal relationships).
- Discuss the limitations of both approaches.
