
1: Fill out this short survey about Day 2: goo.gl/forms/U4kigxnyhJg3qIKy1

2: What's your working definition or previous exposure to network analysis? What do you think are the opportunities and limitations?

With your neighbor, discuss how you are using, or plan to use, network science for your research.

- What networks are you examining?
- How was this network constructed?
- What are the nodes and links?
- Is it temporal? Are the edges weighted or unweighted? Is the network bipartite?
- How does this data structure allow for different analyses than time series or traditional survey data sources?
