
1: What's your working definition or previous exposure to ethics? What do you think are the opportunities and limitations?

With your neighbor, discuss a research scenario in which you have felt ethically unsure.

- Explain why you felt unsure.
- How did you proceed (or how do you plan to proceed) with your research project?

2: Make sure that you have Anaconda, Python 3, and Jupyter notebooks installed on your machine. We will not be using either today, but will begin using both tomorrow. Work with your neighbor and ask Allie or Brian if you run into any problems.

1. Installing Anaconda: <https://www.anaconda.com/download/>. (This step should install Python and Jupyter notebooks.)
2. Check that you have Jupyter installed correctly.
 - (a) Download this notebook: <https://goo.gl/V3yZEe>
 - (b) Navigate to the location of that notebook on your machine in terminal (`cd Downloads`)
 - (c) Type `jupyter notebook` to launch the notebook in your default browser
 - (d) Visit the notebook in your browser and try to run all of the cells
